

CastTec

Traditional Fireplace Collection

Cast-Iron Inserts
Marble Mantelpieces

The CastTec Traditional Fireplace Collection is a range of beautiful cast-iron inserts together with complimentary mantelpieces manufactured in solid pine, oak, granite, limestone, marble and slatestone.

Cast-iron products are manufactured in our foundry of 20 years to the highest of standards. Stone mantelpieces are manufactured in Italian Carrara, Spanish Crema Marfil, Turkish Limestone and Black Granite from the Shanxi region of China.

Mantelpieces and inserts shown in this brochure are all interchangeable so that you can design the fireplace set up of your choice. Our cast-iron fireplaces can also be used as real fires, whether it's for gas, electric or solid fuel.

CastTec distribute their own fireplaces across the U.K. to ensure that goods arrive in a satisfactory condition.

The Traditional Fireplace Collection can be purchased via a network of local independent retailers who display our products in a showroom and employ experienced staff with the capacity to arrange an installation with a suitably qualified heating engineer.

We hope that you enjoy viewing our Traditional Collection and that you find something to suit your home and your lifestyle.

Supply Policy

Cast Tec only supply reputable outlets that display its products in a showroom and have the facility to arrange a professional installation.

Professional advice and experience are essential when contemplating the purchase and fitting of a fireplace as every installation is unique and is governed by regulations.

An installer for gas fires should be a 'Gas Safe' Registered Engineer.

An installer for the solid fuel should be a HETAS Registered Engineer.

To locate your local Retailer please visit our website www.casttec.co.uk or use the QR scan code.

FIREPLACE OPTIONS

Cast-iron Fires

The CastTec Traditional Collection boasts a range of beautiful cast-iron fireplaces that can be used for gas, electric and solid fuel applications.

Manufactured in the time honoured tradition, these castings are authentic designs and range from plain to ornate.

A gallery of cast-iron insert designs can be viewed on pages 30 to 31.

Castings can also have various finishes such as matt black, highlight polished (showing intricate detail) or traditional antique (graphite).

Stone Mantels

The Traditional Collection has an extensive range of hand crafted marble, granite, slate and limestone mantelpieces.

All mantel designs suit all cast-iron inserts and hearths.

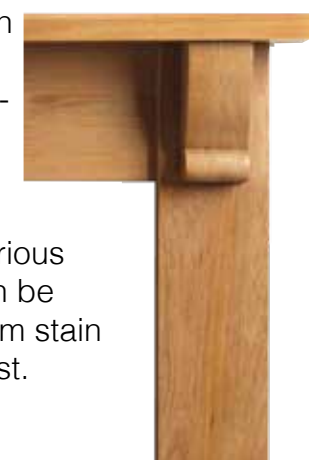

Stone mantel designs can be viewed on pages 24 to 25.

Wood Mantels

The Traditional Collection has an attractive range of solid Oak and Pine mantelpieces, which can be viewed on pages 26 to 27.

These mantels come in various sizes and designs and can be finished in a light or medium stain or left unfinished on request.

Tiles

Some of our cast-iron inserts require tile sets (or cast-iron sleeves). Our tiles are tube-lined and hand painted in the traditional way.

Two five tile runs or two cast-iron sleeves make up a complete tile-set. Tile designs have several colour options and can be viewed on pages 28 to 29.

Med Poppy Tile

Med Poppy Sleeve

Hearths

The Traditional Collection has a range of beautiful hearths to compliment any chosen fireplace design.

Hearths are boxed and lipped or come in our Munro style, a more robust and contemporary design which includes a solid bullnose edge to match many of our mantel designs.

Cast Mantel Clifton Arch Black Finish
Verona (Italian Carrara)
Fire-Back Attached
Hearth Tiled (Ciara Slate)
1460mm x 438mm x 65mm

Gas Cast Tec Arch (input 6.9kW)
Solid Fuel SF Kit C
Electric Electric Arch

The Clifton Arch insert is shown here in a matt black finish and contrasts beautifully with the Verona mantelpiece in Italian Carrara marble.

The Clifton is also available in a highlight polished finish overleaf.

Cast Mantel Clifton Arch Polished Finish

STONE MANTELPieces

The Kensington mantelpiece, shown here in pure Slatestone (also see page 9) is our exclusive design, with bullnose edges leaving a smooth and resilient finish to the touch. The simple and popular design is suitable for any décor and matches our sturdy Munro hearths.

The Kensington design is also available in a larger size (1500mm or 59" shelf) as the Hexham and comes in a range of other materials such as Crema Marfil pure marble or micro marbles Roman Stone and Polar White. For more options visit our website www.casttec.co.uk.

The Traditional Collection has two pure Black Granite mantelpiece designs, the Flat Victorian, and the Athena which sports a pair of turned corbels. Black granite is available in highly polished or honed (matt) finishes.

Mantel Dimensions:

	A	B	C	D	E
Athena	1350	1150	1355	250	75
	1500	1150	1355	250	75

	1500	1145	1355	205	75
Kensington	1350	1133	1300	207	75
Verona	1500	1150	1425	250	75
William IV	1500	1170	1375	300	75

MARBLE MANTELPieces

The Traditional Collection boasts a range of four stunning mantelpiece designs in pure Italian Carrara marble, manufactured in the time honoured tradition going back as far as the 19th century.

The Flat Victorian is the simplest design and wouldn't be out of place in the most contemporary of settings today. The Verona and William IV sport beautiful hand carved corbels to support the shelf above. The Corinthian mantel displays exquisite Acanthus leaf carvings in the top corners.

Carrara marble was created millions of years ago

and as such will have natural veining, colour variation, faults and imperfections often considered to be part of its beauty. The pure marble you see in a showroom or in this brochure is unique and can't be identically replicated.

If you feel that this natural variation is likely to cause any distress, please opt for a man-made micro marble design instead. Roman Stone (cream) and Polar White are manufactured in 95% pure crushed marble and 5% resin, creating a more consistent colouration. The Kensington design overleaf is available in such materials.

WOOD MANTELS

SOLID OAK & PINE

The CastTec Mantelpiece Collection is a range of beautiful handcrafted mantelpieces manufactured in solid Oak or Pine.

Available in eight designs, some mantels sport a traditional corbel, others are plain or there is the ornate splendour of the Bamburgh (*only available in Oak*).

All mantels are available in a light or medium oak stain, or they can be supplied with no finish to enable you to stain, wax or lacquer in a bespoke manner. Pine mantels have an antique pine finish.

Our mantels are manufactured to an exceptionally high standard using craftsman with over 20 years' experience. Whilst only solid oak is used in the construction of our mantels, sometimes it is necessary to join wood pieces together sympathetically in order to reduce wastage.

All mantel designs have an internal rebate of 75mm (3") providing the space to accommodate a cast-iron fascia.

measurements in millimetres

HAND PAINTED TUBELINE TILES

Tubeline Tiles were traditionally made to withstand the high temperatures generated by a working fireplace and performed the practical function of reflecting heat into the room.

With a choice of six designs and various colour

options, two runs of five tiles make up a set to fit into a tiled insert.

Poppy tile sets include a left and right-handed design. Our hand painted tubeline tiles are manufactured in the UK in the traditional way and will be subject to colour variation and crazing.

HEARTHES

The Traditional Collection boasts a range of beautiful, practical and robust hearths to suit the fireplace of your choice.

Suitable materials used for our hearths include honed or polished black granite, and Slatestone.

Hearths come in three different styles:

Boxed & Lipped:

These are traditional hearths with 20mm thickness and 30mm risers below.

Munro:

These are more robust and contemporary having a 30mm thickness and 20mm risers below. Munro hearths are softer on the eye and to the touch having attractive rounded bullnose edges.

Solid Fuel:

Hearths used for wood burning or solid fuel appliances are traditionally cut into four sections and fixed back together to allow for expansion.

CastTec supply a sturdy sectioned Munro hearth in honed or polished black granite for use with solid fuel appliances.

CAST-IRON CARE

PACKAGING

Your CastTec cast-iron fireplace is packaged so as to minimise exposure to adverse elements and should reach you in perfect condition.

Your fireplace should be stored in a warm, dry environment and remain packaged until it is ready to be installed. This will prevent accidental damage being caused, which will not be covered under warranty.

CLEANING

Your cast-iron fireplace requires only the minimum upkeep and it should remain in superb condition for many years.

Matt Black finishes can be maintained simply by dusting with a dry paintbrush. CastTec matt black stove paint is available for touching up if necessary but expert advice should be taken before application.

Antique finishes can be maintained simply by brushing with a dedicated shoe or polishing brush. Grate polish should only be applied if the original finish becomes too tarnished.

Polished and Highlight Polished areas can be wiped clean with a dry cloth, especially if an 'orange' colour appears on the waxed polished surface after fitting. Severe tarnishing on polished areas can be improved by using a very fine wire wool.

WARNING

Cast-iron products are vulnerable to rust and tarnishing if exposed to dampness or water. Avoid using damp clothes, water based liquids, furniture polish, detergents, oils, grease etc. on the surface of the casting. Should your fireplace become wet for any reason, dab it gently with a dry cloth. This should prevent any tarnishing or rust from forming.

It is normal for some discolouration to occur to the working parts of a cast-iron fireplace, especially where it comes into contact with severe heat or a naked flame. This discolouration will not effect the strength or practicality of the parts affected.

Fire Cement Black (1kg or 10kg) is a non-combustible high temperature (1400C) putty for bonding low porosity surfaces and for general sealing and repairing work.

Cast Tec Stove Paint (400ml) is a fast drying high temperature (up to 650C) paint for use on wood, heat resistant boards, stoves, cast-iron fires, cookers & chimineas.

Flueseal Black 300ml is a high temperature (1000C) Silicone Sealant where extremely high adhesion is required with a rigid bond.

Flexseal Black 300ml is a high temperature (300C) Silicone Sealant for use where good adhesion and a flexible bond required.

Important Information

Products shown in this brochure are manufactured for Cast Tec Ltd., who, with a professional group of companies, distribute them exclusively in the U.K. Goods must be checked prior to installation, as no responsibility will be accepted thereafter for the redecoration, removal or reinstallation of products.

Faulted goods must be reported within 48 hours of delivery or as soon as practicable.

Suitably qualified installers should carry out installation of CastTec appliances. No responsibility will be accepted for damage or problems arising from an incorrect or unqualified installation.

Cast Tec Ltd., reserve the right to delay or withdraw products, change designs, specifications or materials without prior notice due to continuous product development or supply issues.
